Poroxe haa Tavasot ee Rexim ee Jomhur iye Eslaam i Iran Dozdid ee Wod e Amaa Pas Az Bargardaandan ee Laptop Va Etelaa'aat Va Tajhizaat KHodam, 2 Poroxe ye MrSanad (Qesmat ee Front Va Backend) Va Exchange Raa Tori Eslaah Kardam Ke Natavaanad Kaar ee Digar i Anjaam Dehand Va Be Ein Tartib Adam ee Mawru'iyat ee Rexim Va Afraad ee Aan Raa Awkaar Kardam.

GitiApp, GK-Project, GK-Admin, SGPPlus Android Raa Ham Hazf Karde and.

Android java, Desktop C#, Sql Server, Asp.net Core Veb api C#, Asp.net MVC C#, I have skills and resume in database analysis and design.

All apps and programs are written by me, except for the ones I have written (vritten).

Some works that are not in Pdf are available in Twitter(X) Or FaceBook (FB) account.

Some images of apps and programs are not up to date due to updates or the end of cooperation.

The wording in the Persian section has been entirely designed by myself.

The projects were stolen by the Islamic Republic of Iran regime, but after returning my laptop, equipment, and information, I modified the two projects MrSanad (Qesmat ee Backend Va Front) and Exchange so that they could not do anything else, thus exposing the illegitimacy of the regime and its people.

GitiApp, GK-Project, GK-Admin, SGPPlus Android projects have also been removed.

Additionally, in this version, users do not need any special knowledge to update the application. After an update, the program is automatically copied to the server folder where (where) IIS is running and then started automatically. Furthermore, I have added an accounting module, allowing (allowing) users to record their buy and sales. In this version, I tried to avoid using jQuery and wrote the application in JavaScript, similar to how it would be written using the Angular framework. The project has been delivered, but it has not been executed successfully.</p> <p>Implementation year: 2022-2023 CNEA</p>
