Skills

Android java, Desktop C#, Sql Server, Asp.net Core Web api C#, Asp.net MVC C#, I have skills and resume in database analysis and design.

All apps and programs are written by me, except for the ones I have written.

Some works that are not in Pdf are available in Twitter(X) Or FB account.

Some images in the app and programs may have changed due to updates, but efforts have been made to keep both the updates and the images consistent.

The wording in the Persian section has been entirely designed by myself.

Words that I have invented are underlined.

The manner of translation and programming of this part of the writing has been fully completed, I have only carried out its standardization, Likewise, these two forms of speech can be unified.

<p>An upgraded version of the MrSanad application has been developed, with the key difference being that this version runs on IIS and offers improved performance and speed compared to the desktop version of MrSanad. Additionally, in this version, users do not need any special knowledge to update the application. After an update, the program is automatically copied to the server folder where IIS is running and then started automatically. Furthermore, I have added an accounting module, allowing users to record their buy (Winseen) and sales (Lossseen). In this version, I tried to avoid using jQuery and wrote the application in JavaScript, similar to how it would be written using the Angular framework. The project has been delivered, but it has not been executed successfully.</p> <p>Implementation year: 2022-2023 CNEA</p>	<p>Ein Site Erteqaa Yaafte ye Noskhe ye Barnaame ye MrSanad Mibaashad, Baa Ein Tafaavot Ke Dar Ein Noskhe Ruye IIS Ejraa Mishavad Va Daaraaye Amalkard Va Sor'at ee Behtar i Nesbat Be Noskhe ye Desktop MrSanad Ast, Hamintor Dar Ein Noskhe Kaarbar Bedun Niyaaz Be Daanesh Khaasi Ba'd az Update, Barnaame Be Surat ee Khodkaar Dar Pushe ye Server Ke IIS Ruye Aan Ejraa Ast Copy Mishavad Va Start Mishavad.
