This site is an upgraded version of the MrSanad program, with the difference that this version runs on iis and has better performance and speed than the desktop version of MrSanad. Also, in this version, an accounting has been added where users can enter their purchases and sales. This version is written for the individual. In this version, I tried to use Jauery and Js to write like the Angular framework. The project has been delivered but not implemented.

Mohamad Hasan Salmaaniyaan Implementation year: 2022-2023 CE
